

CD/DVD SpeedWrappers

Automatic folded seal finish to CD, DVD & Blu-ray cases

Wrap up to 1200 cases per hour

Suitable for standard jewel cases, Amaray DVD cases and Blu-ray cases

25 case input hopper capacity

Table-top unit

Low cost investment

Fully transportable

The CD SpeedWrapper, DVD SpeedWrapper and Blu-ray SpeedWrapper are fully automatic table top units designed to overwrap CD, DVD or Blu-ray cases at high speed with little user intervention. When your output needs the professional edge or simply requires those receiving discs to know they have not been tampered with, overwrapping is the ultimate solution. The SpeedWrapper is an easy to use, cost effective option. It provides a neat even case wrap with perfect seams time after time.

After initial set-up, simply plug in and start wrapping. Users place cases in the input tray and press the start button. Once operating, the unit can wrap up to 1200 cases per hour.

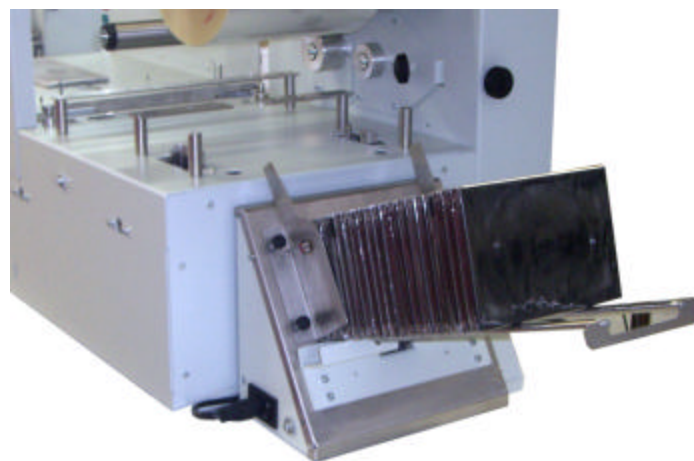

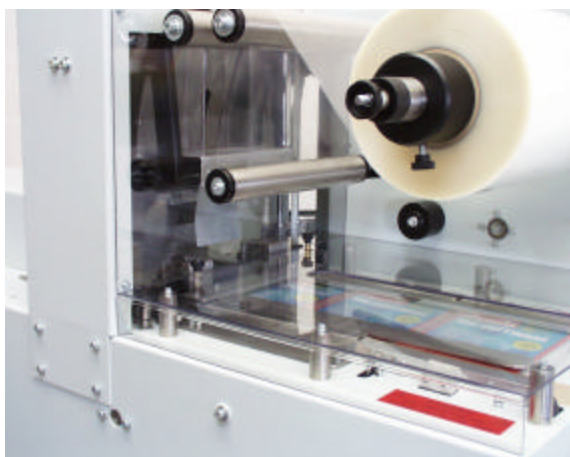

The SpeedWrapper allows the user maximum control with sealing temperature being electronically controlled and adjustable. For safety, the unit will stop automatically in the unlikely event of a jam. This protects the user and allows them to efficiently proceed with wrapping discs with the minimum amount of trouble.

The SpeedWrapper gives a completely professional finish that is store ready for any retail outlet. While shrink wrapping leaves cases with rough, unsightly seams, the SpeedWrapper provides a neatly folded and sealed package.
