

# VS4000 SERIES

Overwrappers for CD jewel cases, slim-line jewel cases, DVD cases, Blu-ray cases & Nintendo DS cases

Semi-automatic operation

Professional wrap quality

Low cost investment

Better finish than shrink wrapping

Wrap up to 250 cases per hour

Table-top unit

With the VS4000 series of overwrapper, operators wishing to wrap small to medium quantities of CD, DVD BD and Nintendo DS cases can now achieve a quality finish equal to the standard of more expensive finishing machines.

Available for standard jewel cases (VS4000), slim line jewel cases (VS4000sl), DVD "Amaray" type cases (VS4000-DVD), Blu-ray cases (VS4000Blu-ray) and Nintendo DS cases (VS4000-DS), these tabletop units are dedicated to small or medium scale production of discs. The VS4000 series are a cost effective solution providing professionally finished packaging for short run work, at a tenth of the cost of industrial equipment.

The semi-automatic operation is simple and effective. A pre-cut sheet of polypropylene wrapping material is placed on the manual platform. The case is simply placed on the pre-cut sheet and the operator closes the cover, which tensions the wrapping and makes the first heat-seal. The case is then placed into the hopper for the second fold and seal operation, which is fully automatic.

The sealing temperature is electronically controlled and can be set to the desired value. An electronic security system stops the machine operating in the case of incorrect usage. Polypropylene wrapping material can be purchased in boxes of 10,000 sheets from Verity Systems.

The result is a professionally folded and sealed case suitable for even the best retail presentations and all this for a fraction of the cost of outsourcing.

Options:	VS4000X To increase throughput	None	None	None	None

The VS4000 series give a wrapping finish equal to that of CDs and DVDs found in any retail outlet. While shrink wrapping leaves cases with rough, unsightly seams, the VS4000 series of wrappers provides a neatly folded and sealed package.

The VS4000X has been designed to increase the throughput of the VS4000 standard CD jewel case wrapper, allowing the operator to wrap up to a total of 400 cases per hour. This small table top unit enables an extra operator to complete the first seal stage.

## Warranty

12 months back to base, all parts and labor included.  
Extended warranties also available.

## Options

VS4000X:  
Additional unit for completing the first manual seal for the VS4000 CD jewel case wrapper.
